BI Tools: Power BI, Advanced Excel, Generative AI for Business

Database Technologies: MySQL, Database Management Systems (DBMS)

Core Competencies: Data Visualization, Business Intelligence, Data Cleaning, Analytical Problem-Solving, Exploratory Data Analysis (EDA)

Tools: Jupyter Notebook, MySQL Workbench

PROFESSIONAL EXPERIENCE

Data Analyst — Greateway Software Pvt. Ltd., Pune

July 2026 – Present

- Built data dashboards using SQL to analyze over 50,000 transactions.
- Developed 10+ Power BI dashboards that accelerated company reporting by 30%.
- Set up a MySQL database for an automated ticketing system, improving customer support efficiency.
- Applied Python-based models to forecast company revenue with 85% accuracy.
- Cleaned and organized data to achieve 99% accuracy, reducing manual work by 40%.
- Collaborated with cross-functional teams to translate data into actionable insights across 10+ business projects.

PROJECTS

EstateWise Realty — Property Sales Analytics & Dashboard | SQL, Power BI, Excel

- Queried and transformed 2,600+ transaction records valued at ₹2,787 crore using SQL (aggregations, CTEs, and conditional filtering) to evaluate sales velocity and price trends across channels.
- Developed an interactive Power BI dashboard featuring dynamic DAX KPIs to visualize location appreciation and segment properties into high-yield investment tiers.

UrbanMart — Retail Sales & Inventory Dashboard | MySQL, Power BI, DAX

- Designed and queried a 2-table relational MySQL schema across 6,000+ records using CTEs, subqueries, and window functions (RANK, ROW_NUMBER, LAG) to track customer lifetime value and SKU health
- Built a Power BI business intelligence dashboard connecting directly to MySQL data models, delivering real-time visibility into regional sales velocity and slow-moving inventory to cut holding costs.

EDUCATION

Bachelor of Business Administration (BBA) in Computer Application — Savitribai Phule Pune University, Pune

2026
