PROFESSIONAL SUMMARY :

Data Analyst with a strong foundation in Computer Applications and technical expertise across SQL (MySQL), Python (Pandas, NumPy), Power BI, and Advanced Excel. Experienced in managing the end-to-end data lifecycle—from relational schema design and automated data cleaning to exploratory analysis and interactive dashboard development across 50,000+ records. Proven track record of optimizing data pipelines to accelerate reporting cycles by 30%. Adept at translating complex datasets and operational metrics into actionable business insights.

TECHNICAL SKILLS

- **Languages & Scripting:** Python (Pandas, NumPy, Matplotlib, Seaborn), SQL (MySQL)
- **BI & Data Visualization:** Power BI (DAX, Data Modeling), Advanced Excel (Power Query, Pivot Tables, Complex Formulas)
- **Data Analysis & Modeling:** Exploratory Data Analysis (EDA), Statistical Analysis, Data Cleaning & Validation, Customer Segmentation, KPI Tracking
- **Developer Tools & Platforms:** Git, GitHub, VS Code, Jupyter Notebook, MySQL Workbench

PROFESSIONAL EXPERIENCE

Data Analyst | Greateway Software Pvt. Ltd. | Pune, India *June 2026*

- Extracted and transformed raw data using Python (Pandas) and SQL to clean missing records, remove duplicate rows, and standardize date and text formats prior to analysis.
- Wrote structured SQL queries using `JOIN`, `GROUP BY`, and common table expressions (CTEs) to aggregate transactional data and calculate weekly business metrics.
- Designed and published interactive Power BI dashboards, using custom DAX measures to track core KPIs and replacing manual Excel reporting for team leads.
- Automated scheduled data refreshes in Power BI and MySQL, cutting weekly report preparation time by 30% and eliminating manual copy-pasting.
- Worked directly with operational teams to understand their reporting requirements, translating raw logs into clean, easy-to-read charts for daily decision-making.

KEY PROJECTS

EstateWise Realty – Real Estate Investment & Sales Analytics MySQL, Power BI, DAX, Advanced Excel

- Cleaned and aggregated 2,600+ property transactions across 9 major metropolitan markets using MySQL, evaluating historical price trends across 2,780+ Cr in portfolio value.
- Engineered analytical SQL queries utilizing CTEs and window functions (`LAG()`, `ROW_NUMBER()`) to measure year-over-year price growth and segment buyers into affordability tiers.
- Built reusable SQL reporting views joining property master data with transaction records, streamlining downstream data pipelines and cutting refresh latency.
- Developed an interactive multi-page Power BI dashboard with custom DAX calculations to track market liquidity indicators, loan-to-value (LTV) ratios, and top-performing sales channels.

UrbanMart – Retail Sales & Inventory Analytics MySQL, Power BI, DAX

- Designed a normalized relational MySQL schema to process 6,00+ records, writing SQL queries with CTEs and window functions (`RANK()`, `ROW_NUMBER()`) to evaluate product velocity.
- Preprocessed and validated raw transaction logs using Python (Pandas), standardizing categorical fields and handling missing values prior to database ingestion.
- Constructed interactive Power BI dashboards with custom DAX measures to monitor sales performance, gross profit margins, and customer lifetime value (CLV).
- Analyzed inventory turnover and days-on-hand metrics to identify dead stock and underperforming categories, providing data-backed restocking recommendations.

EDUCATION & CERTIFICATIONS

Bachelor of Business Administration (BBA) in Computer Applications Savitribai Phule Pune University | 2023 – 2026 | **CGPA: 6.95**

Deloitte Australia Data Analytics Job Simulation – Forage | June 2026

Tata – GenAI Powered Data Analytics Job Simulation (Forage) – *Completed October 2026*
